## CROWNHART APPOINTED.

Governor Makes Appointment to Fill Supreme Court Vacancy.

Governor John J. Blaine on Tuesday appointed Charles H. Crownhart, rector of statutes and former member of the industrial commission, as a justice of the Wisconsin supreme court to fill a vacancy caused by the death of Judge Robert G. Siebler on February 12.

The appointment is for the unexpired term of Judge Siebler and Judge Crownhart must stand for re-election at the spring election next year for the regular ten year term. He was a candidate for the supreme court judgeship in the election a few years ago, but was defeated by Justice Rosenberry.

That the appointment of a judge has caused Governor Blaine considerable worry is evident from the fact that it has been delayed so long, and Mr. Crownhart was appointed in face of the fact that a large majority of the progressive leaders of the state, including Senator LaFollette, supported Judge J. Ray Stevens, of the circuit court, as the logical man for the place.

As a purgative, Chamberlain's Tablets are the exact thing required. Strong enough for the most robust, mild enough for children. They cause an agreeable movement of the bowels without any of that terrible griping. They are easy and pleasant to take and agreeable in effect.—Advt.

## FLATTERING MILLINERY

Three styles, characteristic of the season, are shown here. At the top a hat of light blue tulle, piped with satin, has a beehive crown and a narrow satin-covered brim. It is trimmed with cherries primly set about the crown in clusters and bunched at the right side. A brilliant all-black hat, suited to older wearers, has a glittering fabric over its upturned brim and sprays of feathers at each side. The youthful hat at the bottom, employs ribbon and flowers to trim a shape covered with a novelty material. This hat is shown in several colors with little springtime blossoms massed against the upward-rising brim.

**THE LAWS OF THE SEVERAL STATES** require insurance companies to make and file annual statements showing their financial condition at the close of every calendar year. Necessarily these statements are intricate and technical and require experts to understand them fully. That is why few policyholders try to; they are willing to let Insurance Departments do it for them. After all, what a policyholder in a life insurance company most wants to know is: Has my company been fair and square in its dealings with me and will it continue to be so with my beneficiaries?

The annual statement of The Northwestern Mutual Life Insurance Company shows how its policyholders feel about the matter, because of all the insurance issued by it in 1921, more than 45% was issued upon applications of men already insured in the Northwestern. That is pretty good evidence that policyholders consider the Company "fair and square", and when the company forms the habit it will continue to be "fair and square" after its policies mature.

A policy "matures" when it becomes payable to the insured or to the beneficiary or beneficiaries named therein. It is of the utmost importance that a company always have sufficient funds when called upon to do so. The law requires all life insurance companies constantly to maintain a sinking fund for that purpose and prescribes the method of computing the fund, which is called the "reserve". On January 1, 1922 the law required the Northwestern to have "reserve" amounting to over 455 million dollars, and on that day it had assets to the amount of 507 million dollars. If these assets were good, then the reserve was safe. Just exactly how good these assets are may be judged from the fact that 234 million dollars of them are in first lien, real estate mortgages (155 million in farm and 69 million in city loans) on property valued at 724 million; 180 million in United States and other high-grade bonds, and 76 million in advances made to policyholders under the security of the cash value of their own policies.

The statement shows that the Northwestern had a "reserve for contingencies" over all liabilities amounting to some 24 million dollars. The Northwestern did not break any records in writing new policies in 1921, but it progressed and prospered. It had the biggest and best financial year in its history, permitting it to continue its established "dividend scale" throughout 1922. This

means that the cost of insurance to its policyholders will be less in 1922 than it was in 1921.

If policyholders have noticed, every time they pay their premiums, they get a refund. We have all become accustomed to refer to this refund as a "dividend". It is not a dividend, however, in the commercial sense. Here is how it arises:

Premiums in a mutual company are computed with an allowance for safety and when the cost of the insurance for the year is ascertained, any excess is returned to policyholders. The net cost of insurance, therefore, depends upon this refund of the unused part of the premium.

Policyholders are interested in "expenses", for the smaller the expenses the larger the "dividends". One item of expense should interest policyholders especially, and that is "taxes". For the privilege of doing business for their policyholders, life insurance companies are subject to heavy burdens of taxation, both state and national. Taxes are charged as an expense and if they did not exist, the net cost of insurance would be just that much lower.

Despite this heavy item, The Northwestern Mutual Life Insurance Company has kept up, and we believe it will keep up, its refunds to policyholders; and this it can do because of careful selection of risks, expert and advantageous investment of funds and rigid economy of management.

Just a word as to "management". The Company is required annually to appoint an Examining Committee, consisting of five men who are not interested in the Company in any way except as policyholders, to make a complete examination of it.

The Committee of 1921 was headed by Hon. Antonio Kuchuk, of Shawano, Wisconsin, as Chairman, and among other things, it reported as follows: "From an examination, we are satisfied that the Company is in sound financial condition and conservatively managed, and we are convinced that the policyholders are amply justified in continuing to place their trust in the persons now in office."

The management will be pleased to mail, upon request, a detailed synopsis of the Annual Statement.

## Notices

An Easter sale will be held at the public library on Saturday, April 15, at three o'clock in the afternoon. Fancy needlework, aprons, home-made food and candy will be on sale at this time for the benefit of the library. It is desired that anyone interested in the library, whether personally solicited or not, will contribute one or more articles for this sale.—Committee.

**Couldn't Stand for That.**  
Billy did chores for his father on the neighborhood. In his eagerness to get out to play he had grown careless and several of the women had jacked him up a little. One day he did not go to his work and his father, thinking he had forgotten, reminded him of the fact, when he said: "Have quit, dad; couldn't stand it; I was getting hecked."

**Notice to Mothers.**  
Mothers should see that the whole family take a thorough, purifying system cleansing laxative this spring. NOW IS THE TIME. The family will be healthier, happier, and get along better if the blood is given a thorough purifying, the stomach and bowels cleaned out, and the germs of winter accumulated in the system driven away. HOLLISTER'S SYRUP MOUNTAIN TEA is one of the very best and surest spring medicines to take. Get it and see the difference in the whole family. Their color will be better, they'll eat better, sleep better, and be well and happy. Especially good for women and children.—H. Lappley.

## Pure yeast now concentrated in small dose

With the introduction of Yeast Foam Tablets you don't need to eat large quantities of baking yeast to secure its great health-corrective properties

If you are one of those who have been eating large quantities of baking yeast—and perhaps finding it troublesome to get and unpleasant to take—you will be happy to know that in this new yeast, dried and highly concentrated, you can get the same tonic effects, without any inconveniences and with several extraordinary advantages.

### This yeast corrects a wide-spread disease

Vitamin deficiency, the leading medical men are all discussing, is a disease that thousands of people nowadays suffer from, but which has only recently been recognized.

Unlike other diseases, which come from germs or infections, vitamin deficiency comes from a lack in modern foods of the recently discovered element, vitamin.

Its symptoms are falling appetite; indigestion; loss of weight, strength and vigor; unhealthy skin; nervous troubles and other signs of a "run down" condition.

If you are suffering from any of these disorders, your

trouble may simply be vitamin deficiency, and in all such cases Yeast Foam Tablets are recommended because they are made entirely from pure, whole yeast—the richest source of the essential vitamin.

### Yeast Foam Tablets rebuild tissues

By supplying this vitamin, which many foods wholly lack, Yeast Foam Tablets stimulate the appetite, aid digestion, enable you to get strength and energy from the food you eat and thus rebuild the sick tissues and tone up the whole body.

The purity and vitamin potency of Yeast Foam Tablets is guaranteed by the world's largest manufacturers of dry yeast—the makers for 45 years of the famous baking yeasts, Yeast Foam and Magic Yeast.

This guarantee is your protection, so be sure you ask for and get Yeast Foam Tablets. They are sold by all druggists.

### SPRITGLY SILK FROCKS

Any number of sprightly, new taffeta frocks came, trooping in, in advance of spring, and they were perfectly sure of a welcome. Along lines similar to those in the pretty model shown here designers have made them in very great variety, suited to gay youth and varied to please charming age. In a conspiracy to make them wholly irresistible to gentlewomen, lace is introduced in the sleeves or neck or both, and the silk is used in hand-made embellishments of flowers and ruchings, covered cord or straps. The dress pictured here for afternoon or informal wear is a youthful model with full scalloped tulle over a plain skirt. Its showy sleeves, of the taffeta, are lengthened by a puff of fine net ending in a band of silk at the wrist. Straps of the taffeta extend from the elbow to cuffs and roses of it are set about the tunic. The scalloped edge is finished with a silk-covered cord.

### BLACK EARTH

Mrs. George Freeman has been quite ill for several months.
