APPLEBY TABLET DEDICATED.

A bronze tablet and granite boulder, the gift of the Wisconsin State Historical society, now marks the spot where John F. Appleby conceived and whittled out the first model of his grain binder twice knotted in 1838. It was dedicated last Sunday at the Houghton farm ten miles southeast of Whitewater, and one of those participating was Ferdinand Kraepelin, who worked with Appleby in 1839 when he was fashioning the invention. It was first tried out on a farm adjoining this village. Perhaps some of the older residents can enlighten us on this matter.

The above item is from the daily press. We have made no investigation, but have always understood that John Appleby invented his knotted in Mazomanie, backed by local capital, and it was first tried out on a farm adjoining this village. Perhaps some of the older residents can enlighten us on this matter.

Let us write your Fire and Tornado Insurance.—H. L. Swan.

The Arena H. S. Ag. Fair.

The fair held last Friday by the Agricultural Department of the Arena High school was a decided success. With a beautiful day, an attendance of nearly 1,500 people, and 500 exhibits, the fair was far above all expectations.

Until nearly eleven o'clock, entries kept coming in and nearly swamped the department heads. While the judging was going on, the boys and girls tried their luck in the Wood Identification contest. Walter Zweifel and Elia Winch tied for first, missing only two out of the thirty-five weeds. Kathleen Pfankuch was next, missing only three. The pony race finished the morning's entertainment. It was won by Leonard Turnell, of Mounds Creek.

As soon as dinner was over, the football teams from the Arena Graded school and the combined schools of Mounds Creek and Meadow Vale met in battle. The battle turned to riot when the heavier Rurals ran over five touchdowns for a total of 35 points to 0 for the Grades.

Victor Pfankuch easily handled Ray Peterson in a wrestling match. At the end of the first fall, the victor called it quits and refused to try for another fall. This was the fifty-second boys' class. Twister Lewis and Red Lewis went for three full rounds. Twister looked a sure winner when he threw Red in seven minutes, but Red came back taking a lot of punishment and won the next two falls.

Of course, the classic of the day was the game with Mazomanie. That was a game that gave some grave symptoms of heart failure. Mazomanie started off with a touchdown on an Arena fumble. The boys came back strong and made one for Arena but failed at goal leaving Mazo a one point lead. Again Mazomanie took advantage of an Arena fumble to go ahead. Arena came back to take the short end by one point. Another touchdown by each team and then one for Arena in the last minute of the game, making the score 24 to 19 in favor of the home team. A last look at the exhibits and everyone went home happy.

The results of the school district contest gave Arena the lead with 117 points. Ray Hollow second with 65 points, Mounds Creek third with 52 points, and Meadow Vale fourth with 47 points. The silver cup will be presented at a special meeting and will be kept in the grade rooms at Arena for the coming year.

The guessing contest on the three Guernsey cows resulted in a tie between Mrs. Marie Wilson and George Harrison. They both gave 494 pounds. Her actual production was 494.6 pounds. Maud, 161 pounds, was picked by 28 for the best cow; Mable, 352 pounds, was picked by 27. Although quite a few picked the winner, there seem to be a number who cannot tell a good cow by her looks.

The fair management wishes to take this opportunity to thank the Judges, Miss Greer, Mr. Shields, and Mr. Miller for their help, and also Mrs. Ellis, Mrs. Rogers, Mrs. White, Mr. Cox, Mr. McArthur, and Mr. Seimel for their efforts to make the fair a success.

MARRIED SIXTY YEARS.

The sixtieth wedding anniversary of Mr. and Mrs. Christ Reuter was celebrated at their home in Rosbury, Dane county, last Saturday. Mr. and Mrs. Reuter were married October 9, 1866. Of the fifteen children born to them twelve survive, and were present at the celebration. The daughters are: Mrs. John Schmitz, Mrs. Bert Walsh, Mrs. John Kurt, of Rosbury; Mrs. Albert Looser, of Middleton; Mrs. Anton Roelke, of Mazomanie; and Miss Ella, who lives with her parents. The sons are: Adolph, Frank, Anton, Edward, and Joseph, of Rosbury; and John, of Westpoint. There are fifty grandchildren and eight great-grandchildren. Mr. Reuter is 86 and his wife 78 years of age.

STATE JOURNAL SUE.

A suit for libel asking \$25,000 has been filed against the Wisconsin State Journal in circuit court at Madison by Fred Krause, of Muscoda. The suit is brought for a news story which appeared in the Journal on the 27th of February.

Don't worry. What you fear is not going to happen: If it should happen it will not be as bad as you think, and if it should be as bad as you think, it could be much worse.

GET \$15,000 IN FURS.

Overpowering four night watchmen, as they came on duty, three yeomen blew an empty safe in the H. O. Prange department store at Sheboygan, Sunday night, and escaped with \$15,000 in furs and clothing. They did not touch a large vault which was connected with an alarm.

OPINION ON BEER VOTE.

The people of Wisconsin have a right to express their will to their representatives in congress as well as to their representatives in the legislature, the state supreme court held Tuesday in an opinion by Justice E. Ray Stevens, amplifying the decision of the court holding the 275 per cent beer referendum legal. The court declared that it is entirely within the power of the legislature to order a referendum by a joint resolution. A short time ago the court announced that it had denied the application to prevent the referendum, and this opinion gives the reasons for the court's action.

When Your Car Was New

The valves in the motor were well fitted, well seated. This was done at the factory. But after you have driven your car a few hundred miles the valves undergo a change due to the extreme heat to which they are subjected, by reason of the almost continuous explosions of gasoline in the explosion chamber. This heat treatment they receive changes their shape. The valves become warped, permitting compression to go by. They become "set" in the new form the heat has given them and the heat will not change them again. However, continuous usage will wear them out of true. When this occurs, it is absolutely necessary to refit and reset the valves, in order to have a smooth running, smooth working motor, such as you would like to have in your own car.

Knowing the importance of perfect seating valves in a motor, we use a KWIK-WAY VALVE FACING MACHINE and KWIK-WAY Reseating Tools which, due to their extreme accuracy will true up the valves and valve seats in the motor, so that they will be better than when they were new, and you will get more mileage from your gasoline.

Most shops use grinding compound, which does not true up a warped or worn valve, or a worn valve seat and this means that you are paying out your money for results that you are not getting.

We will be pleased to show you this new equipment and talk it over with you. Yours for real service,

He was appointed officially by the executive council which met Wednesday morning at national headquarters in Rock Island.

GONE TO THE "GREASERS."

Frank Lloyd Wright, the former Spring Green architect, having found refuge in Mexico from the vengeance of his estranged wife, Miriam Noel Wright, will never return again to the United States unless Miriam decides definitely, and with dispatch, to carry through the divorce suit which has been in and out of the courts for the last year. Furthermore, unless the divorce is carried through, Mr. Wright will take up his tracing pen and blue prints again in Mexico and settle down there to peacefully continue the profession which has made him internationally famous. This is the authoritative prediction made by Levi H. Bancroft, who is counsel for the fugitive architect.

The lady who wore a red petticoat has a daughter who refuses to wear even a white one.

Sometime or other haven't you run into this identical situation?

An unexpected storm—a sudden cold spell that found you without warm winter clothes?

Yes, this has happened.

Haven't you said to yourself: "Never again! Next year I'll have what I need when I need it."

Unfortunately, no one knows just when "bad" weather will strike. But we do know that we will have rain, mud, slush and snow this year as well as in the past years, and it is just around the corner. If our weather reports tell us anything, it has already arrived in many localities, and the demand for warm clothes is just as near, and that is why we are urging you to get ready now.

The time is here for Hi-Boots. \$6.00 and \$7.50 for 16-inch boots. These boots are designed for the out-of-door man's needs. They are big, staunch, rugged boots for hunting, fishing, hiking or any other wear that requires service and comfort.

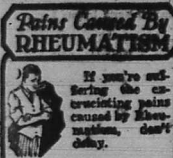

OVERCOATS \$10.00 to \$30.00.

Introducing to you another new lot of Overcoats that came this week. All the men like them because of their long, loose, swinging lines. It means a great deal to you to know that your overcoat has that custom-tailored look, that it's made of good quality fabric, on good, stylish, conservative lines.

All kinds of Winter Clothing that will keep you warm and comfortable from the crown of your head to the soles of your feet.

MAZOMANIE, WIS., OCT. 15, 1928.

At The Majestic Theater.

"My official Wife," the Warner production, starring Irene Rich and Conway Tearle, directed by Paul Stein and coming to the Majestic Theatre Saturday, was filmed during the month of July in Hollywood, notwithstanding which it contains a scene of swirling winter in snow-swept Russia. And the scene is not a fake. It was taken in the mountains within fifty miles of Hollywood. The sets were built in the snow, some time before the episode was to be shot. Upon the report that snow was beginning to fall, the company was rushed out of Hollywood summer up into the wintry hills. Although the filming of the scenes required eighteen hours, the blizzard was still showing no signs of abating, and much difficulty was experienced in moving the heavy trucks for the return.

Love, Joyner, an old Soak, his son, a chorus girl and a musical comedy and a bootlegger are a few of the elements composing "The Old Soak," the picture which comes to the Majestic Theatre Sunday. It is Lena Horne's first starring vehicle and she does exceptionally well in the title role. Edward Sloman plays the juvenile lead while June Marlowe plays opposite him. Lucy Beaumont is the mother; George Siemann, the bootlegger; William Mong, the crooked cousin; Gertrude Astor, a friend; Adia Gleason, a daughter; Tom Rickert, a roger; Louise Fazenda, a maid. The son gets into trouble, and the old Soak chides the blame. It is one of the best pictures this theatre will offer this season.

"Mare Nostrum" is a powerful story of the sea at the time of the great World War. Blago Berez is the author and Alvin Terry and Antonio Moreno have the leading parts. It will be shown at the Majestic Theatre Wednesday, October 20.

The mutual devotion of a man and a dog is the story of "Flashing Fangs." F. B. O.'s first picture starring Hanger, the famous police dog, to be shown at the Majestic Theatre next Friday, October 22. Hanger and the man he adopts weather many storms together, including the rage of the entire countryside who look with great disfavor on the pair. Hanger and his master, however, both have a chance to redeem themselves and when this is accomplished they claim the love of the two who have been waiting for them. The cast includes such favorites as Robert Ramsey, Lotus Thompson, Edith Chandler, Clark Constock, Ada Mae Vaughn and Mary Dow.

From Field and Furrow.

Wisconsin's production of condensed milk amounted to 564,000,000 pounds in 1925. This output is four times greater than it was ten years ago.

Of all the dairy cattle in the United States, hardly three per cent are pure breeds, registered in the herd books of the breed associations. With this great number of grades and non-descript aforesaid, purebred breeders need have little fear of the future of their business.

Inventing the "worldly goods" of the Wisconsin Experiment Station and College of Agriculture was no difficult task for Dean William Aronson Henry back in the early eighties. He fondly referred to the entire equipment, including "a small farm house, two ordinary barns, a little livestock, a few tools and an armful of books."

Are you getting your share of dairy products? Home Economic authorities feel that the family's bill for milk, butter, cheese, ice cream and other dairy foods should represent 40 per cent of the total expenditure for food. These foods contain a large amount of indispensable substances which enable the body to build up a strong reserve that helps in keeping away disease and sickness.

"See Wisconsin first" is the slogan that country newspaper editors, members of the Wisconsin Press Association have followed in arranging their summer tours. During the past six summers, the editors and their friends have taken a four-day trip through practically every section of the state. This year, their route led them into Wood, Marathon, Taylor, Price, Ashland, Bayfield, and Douglas counties.

One out of every eight cream separators, inspected by the testers of Wisconsin's cow testing associations, was found to be losing at least 0.05 per cent butterfat. In some cases, the loss actually exceeded one per cent. Generally, the testers report, the cream loss can be greatly reduced by adjusting the cream screw and replacing the worn out parts. They advise regular testing of the skim milk, either in the cow testing association or at the local creamery.

Better Feeding Doubles Cash

BETTER feeding of cows is one sure way of increasing dairy profits on many farms, declares the Blue Valley Creamery Institute. Its possibilities were shown by an interesting test completed recently by the Indiana Experiment Station with five mature cows typical in appearance and production of the average in that state. Records kept on these cows in the herds of their owners where they were fed and cared in accordance with each owner's methods, showed that at the end of the year their average production was 5,000.8 pounds milk containing 20.9 pounds butterfat. The cost of the feed they consumed was \$42.72 and the return above feed cost was \$77.46 per cow.

At the end of the year these same five cows were purchased by the experiment station, were given average good conditions for milk production and were provided with a ration made up of legume hay, corn silage and a good grain mixture for supplementing these roughages. Their records at the end of the second year show the profitability of better methods. Their average milk production was increased to 5,892.2 pounds and fat production to 216.8 pounds. While the feed cost was \$72.34, or 65 per cent more than the previous year, the average return above feed cost was \$135.04, or 74 per cent more than the year before. In other words, each cow made \$57.58 more over feed cost the second year under better condition for feeding than she did the year before when she received poor roughages and grain mixtures.

"Signs of quality" mark the location of some of Wisconsin's best cheese factories. Attempting to improve the quality of its products, the Wisconsin Cheese Producers' Federation has inaugurated a plan whereby factories producing high quality cheese receive a well built and attractive roadside sign. These markers, similar to the old English tavern sign, do not become the permanent property of the winning factory, but can be recalled by the Federation any time the quality of the factory's product deteriorates. This past spring ten factories were "decorated" with signs.

AUTOMOBILE THEFT RING.

The eighth arrest in connection with the operations of an Illinois-Wisconsin automobile theft ring was announced by Chicago police last Thursday night on receipt of information that Peter McIntyre was being held in Kentland, Ind. James Connor, who Wednesday night attempted to dial his way to freedom through the wicket of the Elkhorn, Wis., jail, and four others arrested with him, sons, Darius, Wis., were brought to Chicago Friday. Connor's escape attempt was frustrated when the noise of his tools scraping on the jail wall attracted attention.

His word is his bond!

A "personal guarantee" means very little to you unless you know the man who makes it.

Ninety per cent of the things bought for your home are selected by the lady member of the firm. She is the purchasing agent. Most men admit that she is a capable buyer, and the reason is this: She must be shown — convinced by proof — that an article is what she needs and is worth the price!

For that reason, she sees the advantage of dealing with a local merchant — a man whose "personal guarantee of satisfaction" means just what it says.

She knows that what he advertises in this paper is entitled to her consideration. Because she has confidence in her neighbor — the local dealer — she can safely invest the family funds in what he guarantees.
